

Vehicle-Specific Application Information Current as of August 20, 2010

Please note: this is NOT a comprehensive listing of all available vehicle information. For additional information, please visit www.roadmasterinc.com/vehicle_guide.

Every reasonable effort was made to verify the accuracy of this information; however, ROADMASTER, Inc. does not warrant its accuracy and disclaims all liability for any claims or damages which may result from errors or omissions.

Note A: to determine if the towed vehicle and the motorhome have 'separate' or 'combined' brake and turn signals — in a 'separate' system, there are amber or red turn signals which are separate from the brake lights; in a 'combined' system, the brake lights do the flashing for the turn signals.

Note B: to determine if a motorhome with separate brake and turn signals has a 3-to-2 converter, use a test light to find the turn signal and brake light circuits on the motorhome electrical socket. If the same circuit energizes both the turn signals and the brake lights, a 3-to-2 converter has been installed.

Note C: vehicles highlighted in yellow denote a change since this document was last published. In most cases, it is simply the addition of a new model year.

Brake and turn signals — unless the towed vehicle has separate brake and turn signals (see Note 'A' above), the motorhome brake and turn signals must be inspected by the installer to determine which electrical accessories to install. Based on the brake and turn signals in both vehicles, there are three possibilities: 1) If the towed vehicle has combined and the motorhome has combined (see Note 'A' above), then a Brake-Lite Relay (#88400) is recommended. 2) If the towed vehicle has combined and the motorhome has separate with a 3-to-2 converter (see Notes 'A' and 'B' above), then a Brake-Lite Relay (#88400) is recommended. 3) If the towed vehicle has combined and the motorhome has separate **without** a 3-to-2 converter (see Notes 'A' and 'B' above), then a Brake-Lite Relay (#88400) **and** a Brake-Lite Relay (#732) are recommended.

Purpose of the stop light switch — the motorhome monitors on all ROADMASTER supplemental braking systems always indicate when the brake pedal is depressed. This is a safeguard against accidental damage to the towed vehicle's brakes — if the customer positions the supplemental braking system incorrectly, with the brake pedal depressed, the monitor will alert him before the towed vehicle's brakes are damaged. In some towed vehicles, a stop light switch must be attached to the brake light switch to accomplish this.

Questions? Comments? Call ROADMASTER Customer Service at 1-800-669-9690.

Towing and Suspension Solutions

	Must fuses be pulled to tow?	Must the battery be disconnected to tow?	Is this vehicle equipped with a feature that drains the battery during towing? If yes, a 765 is recommended.	Is a 12-volt outlet kit (#9332) recommended?	BrakeMaster seat adaptor — RECOMMENDED in black print; REQUIRED in red print	Is a stop light switch required? If yes, part number is listed in red. Black denotes availability of the part but not the requirement.	Turn signal lighting Note: if the towed vehicle has separate brake and turn signals — two additional diodes or a Brake-Lite Relay (88400) are recommended.	Color of the towed vehicle's brake light switch wire.	Does the universal wiring kit (#154) work on this vehicle?	Does the bulb and socket kit (#155) work on this vehicle?	Special notes

Wiring requirements note table

- 1 BrakeMaster only with part #900002 must be installed.
- 2 See vehicle specific instructions on web site (roadmasterinc.com/vehicle_guide).
- 3 Box braking systems won't fit

Towing and Suspension Solutions

4 Fuse(s) must be pulled

5 Battery must be disconnected

6 Magnetic tow lights are the only wiring solution for this vehicle at this time

7 If using a supplemental braking system, the battery will drain.

Must fuses be pulled to tow?	Must the battery be disconnected to tow?	Is this vehicle equipped with a feature that drains the battery during towing? If yes, a 765 is recommended.	Is a 12-volt outlet kit (#9332) recommended?	BrakeMaster seat adaptor — RECOMMENDED in black print ; REQUIRED in red print	Is a stop light switch required? If yes, part number is listed in red. Black denotes availability of the part but not the requirement.	Turn signal lighting Note: if the towed vehicle has separate brake and turn signals — two additional diodes or a Brake-Lite Relay (88400) are recommended.	Color of the towed vehicle's brake light switch wire.	Does the universal wiring kit (#154) work on this vehicle?	Does the bulb and socket kit (#155) work on this vehicle?	Special notes
